

Izumi America

About us

We offer the finest finished products to enhance your presentation. To maintain your competitive edge in the business world, your messaging must be displayed on superior screen material. Our material is designed with the greatest consistency and quality ensuring a perfectly flat viewing surface without any creases or wrinkles. Our projection screen vinyl materials are manufactured with many different qualities which result in great color reproduction.

BACK-LIT

Back-Lit awning fabric product is made of vinyl coated woven polyester, this fabric allows for consistent translucency and maximum brilliance. The face and back are the same color, allowing for a pleasant glow beneath the fabric.

Back-Lit is highly resistant to the following:

- Mildew
- Water
- Fade
- Rot
- Abrasion
- Scuffing
- UV Light
- Weathering

The Back-Lit is durable with exceptional tensile and tear strength. This outdoor fabric is ideal for home exterior projects, commercial awnings, window awnings, and more.

Back-Lit is compatible with several graphics' applications, including heat transfer, paint, and screen printing.

5 Year Warranty
